BLACK OAK BOULEVARD

SOLID PLANK
FLOORING

STYLE CHART

B 6.3

Junckers Black Oak flooring recreates the appearance of the much sought-after "bog oak" where ancient oaks preserved beneath peat bogs for hundreds of years emerge with a similar "through and through" black colour.

Junckers solid plank flooring is produced and categorized according to Junckers factory standards and in accordance with EN 13226 and EN 14342. The floors are made exclusively from solid hardwood, with all the characteristics typical of this natural material. Each stylechart will display a unique range of grain and colour characteristics. The photographs are designed to show the average appearance of the style and species. It is normal to see a variation in appearance between individual boards and packs. Floors laid at different times may vary slightly because of this average grading. Hardwood floors may fade and change colour over time, especially when exposed directly to sunlight.
