OAK BOULEVARD

SOLID PLANK
FLOORING

STYLE CHART

B 6.1

Oak is a hardwood species which is characterised by being hard and hard-wearing. At the same time it has a clear and interesting grain structure. The warm, honey coloured wood is extremely suitable for flooring. Over time, natural ageing gives the wood a golden glow.

Junckers solid plank flooring is produced and categorized according to Junckers factory standards and in accordance with EN 13226 and EN 14342. The floors are made exclusively from solid hardwood, with all the characteristics typical of this natural material. Each stylechart will display a unique range of grain and colour characteristics. The photographs are designed to show the average appearance of the style and species. It is normal to see a variation in appearance between individual boards and packs. Floors laid at different times may vary slightly because of this average grading. Hardwood floors may fade and change colour over time, especially when exposed directly to sunlight.

TECHNICAL INFORMATION

20.5 mm Oak Boulevard plank - width 185 mm

Version B6.1
10.2013

Oak Boulevard Harmony

Oak Boulevard Harmony has an over all fairly uniform appearance, with some natural colour and structural graining variation, including sapwood between the planks. A limited number of medium sized sound knots, smaller sized black knots and knots in clusters. Knots and other natural features such as hairline splits are all factory filled.
