

AIR-CHANNEL® STAR

(WITH SUBFLOOR)

*STABLE. STRONG. SECURE.
EVEN IN THE TOUGHEST CONDITIONS*

Robbins Air-Channel Star system combines anchored laminated sleepers to provide a system with dimensional stability and superior performance. The Air-Channel Star sleepers are laminated and engineered to be less susceptible to physical changes due to moisture compared to solid softwood sleepers. Air-Channel Star is a proven performer and an excellent choice for your gymnasium project.

- *Wide-body, low-profile, engineered sleeper anchored uniformly to concrete substrate for enhanced stability.*
- *Engineered sleeper enhances performance, flexibility and uniformity and provides dramatic improvement over softwood subfloor components.*
- *Robbins' patented "Posi-Anchor"™ built-in depth stop prevents shockpad over-compression, providing uniformity and stability.*
- *Optional 7/16" (11mm) resilient EPDM Bio-Pad,™ for shock absorption and vibration control.*
- *Continuous subfloor provides uniformity and strength for large bleacher loads and portable backstops.*
- *DIN-certified, meets or exceeds all six DIN 18032-2 criteria for ball bounce, shock absorption, deflection, area of deflection, rolling load and surface friction*

MAPLE FLOORING SYSTEMS

AIR-CHANNEL® STAR (WITH SUBFLOOR)

Product Specifications

System Type Anchored Resilient Sleeper/Subfloor

Slab Depression 2 1/2" (64mm) with 25/32" (20mm) maple
2 3/4" (70mm) with 33/32" (26mm) maple

Surface- MFMA Northern Hard Maple Robbins Continuous Strip® XL (FJ) or Random Length (RL)

Anchorage Concrete Anchor & Sleeve

Vapor Barrier 6 MIL Polyethylene

Subfloor Construction 7/8" thick wide body laminated sleeper

Resilience Layer 7/16" Resilient Pad

LEED Contributions MR credit 4, 5, & 7
IEQ 4.1, 4.2, 4.3, 4.4

FSC® Lumber Available
*Credits are based on products selected and location of facility

Optional Construction Contact a Robbins Representative for Alternative Systems

Warranty 1 year Industry Standard with optional Extended Warranty Program (*Egis Floorlife*)
