FOCUS

Creative Wood introduces the FOCUS Casework Series, a unique line of thermally fused laminate office furniture.

FOCUS Caseworks comprise classic cabinets, credenzas and pedestals, along with a broad range of freestanding desks, tables and storage products that combine to create diverse solutions for both the private office and open work areas. A clean, contemporary aesthetic is enhanced by a choice of finishes and three pull options in black or brushed metal.

In the private office, FOCUS projects a distinctive look at an affordable price. Crisp, clean lines and a striking mix of finishes create a contemporary look that elevates the aesthetic of the private office.

FOCUS Casegoods allow for both freestanding and wall-hung configurations in the open plan, resulting in highly functional spaces that address the specific needs of the individual worker and the requirements of collaborative teams.

A simple set of components creates a variety of classic office configurations that include outboard desk run-offs with $\frac{3}{4}$ height modesty panels, lateral files and overhead cabinets. Multipurpose storage units in contrasting finishes lend definition to the individual workspace and enhance the landscape of the office as a whole.

FOCUS Caseloads create functional and efficient open and collaborative work areas at any scale. Making maximum use of space with minimal components, FOCUS addresses the smaller footprint of many contemporary offices. A sleek 1" thick edge detail complements the lighter scale of FOCUS components and today's more compact workspaces.

Using the simplicity of basic forms and materials, FOCUS creates a modern, light and clean look. FOCUS reception is fashioned from a standard desk unit and is accented by a contrasting floating front and glass counter top.

FOCUS conference and meeting tables provide convenient power, communication and data ports that are easily accessible at the work surface. Optional flip-up ports are flush with the table surface and do not detract from the aesthetics of the product. A complete offering of credenzas, buffet height cabinets and accessories are available.

The FOCUS Casegood Series offers a selection of conference and meeting tables in a variety of shapes, base options and sizes ranging from 72"-6' to 288"-24'. The simplicity of the design is suitable for all office environments from budget to high end.

FOCUS conference tables provide a focus for conversation among those present and for those linked through video conferencing. The straightforward design of this table anchors a room and facilitates interaction. Technology ports are placed at multiple locations at the surface and are available in laminate or metal.
