

REGUPOL
AKTIVPLUS

PERFORMANCE RECYCLED
RUBBER FLOORING

1/2" THICK FLOORING SYSTEM

Step up to the next level with our 1/2" thick, high density **REGUPOL** AktivPlus. A full 25% thicker for added durability and shock absorption, this rolled rubber flooring insulates the floors from extra heavy weights and the repetitive, abusive impact of weight and cardio equipment. Its ability to withstand incredible abuse makes it highly suitable for placement under heavy workout equipment, including weight racks, machines, exercise equipment and even as platform flooring for Olympic lifting stations.

REGUPOL AktivPlus is extremely resilient, so it feels soft and comfortable underfoot and easily absorbs shocks. This means it provides superb cushioning and helps reduce muscle stress and injury, ensuring excellent protection for athletes.

Available in 11 standard colors or customize your own and let the environment reflect the values of your brand. The beauty of AktivPlus is in its brilliant colors and cushioned comfort. It truly is an attractive solution for tough environments.

Train athletes to be the best, while training on the best.

REGUPOL CRASH

The AktivPlus system also features flush inlaid platforms with **REGUPOL** Crash drop zones, allowing for Olympic platforms to sit perfectly in-line with the rest of the floor and, in turn, maximizing space for athletes, limiting tripping hazards, and making it much easier to clean.

Crash is our ultra-dense, proprietary surface engineered to withstand the rigors and abuse of heavy impact in the weight room. It was designed to mitigate noise, reverberation, and the bounce-back of the barbell to better enhance athlete safety and well-being. It is offered in three standard thicknesses: 3/8", 1/2", and 1". It can also be customized to meet your individual facility needs.

REGUPOL CRASH

PRODUCT SPECIFICATIONS

Dimensions: 1/2" x 48" wide rolls

PRODUCT PERFORMANCE DATA

Force Reduction	ASTM F2772	19.70%
Energy Restitution	ASTM F2772	80.20%
Abrasion Resistance	ASTM D3389	<1.7g, 1000 cycles
Static Load Limit	ASTM F970	0.001" @ 250 PSI
Coefficient of Friction	ASTM D2047	>0.95
Slip Resistance	ASTM F2772	Pass
Pill Test	ASTM D2859	Pass
VOC Compliant	ASTM D5116	Yes
Density	ASTM D3676	60 pcf
Hardness	ASTM D2240 (Shore A)	60 +/- 5
Tear Strength	ASTM D624	80 pli min
Elongation	ASTM D412	>145%
Tensile Strength	ASTM D412	>220 PSI
Flexibility	ASTM F137 1/4" Mandrel	Pass
Resistance to Chemicals	ASTM F925	No Change
VOC Compliant	ASTM D5116 / CA 1350	Yes
LEED Qualification	Qualifies for Material and Resources and Indoor Environmental Quality Credits	
Rolling Load	EN1569	Pass
Resistance to Impact	EN1517	14 N/m
Resistance to Indentation	EN1516	0.1mm
Vertical Deformation	ASTM F2772	1.4mm
Environmental Product Declaration	ISO14025	-101047-4150

HIGH PERFORMANCE IN **LOW PLACES**

REGUPOL AktivPlus rolls fit together perfectly providing the utmost seamless protection. It's hard to beat the resiliency, durability, slip-resistance, and moisture-resistance of **AktivPlus**, making it the flooring of choice for student and recreational athletic facilities.

HOW WE SUPPORT YOUR BRAND IN YOUR FLOOR

We start with your gym, team, or company's logo.

Our technicians take your image (logo, symbol, saying, etc.) and electronically convert it to a graphic format that works with our water-jet cutter.

Once your image is ready, it is saved and we cut the image in-to and out-of the appropriate colors for your floor.

When your finished **REGUPOL** floor is installed, you will be as proud of the craftsmanship as you are of your brand.

Ask our experts about the optimal solution for your project:

HOW ARE SOLUTIONS EASY AND INSPIRING? **TOGETHER**

We've got it covered.

REGUPOL is more than sports and multi-purpose surfaces. More than our acoustic underlayments. And more than our state-of-the-art track and field surfaces. For over 65 years, providing solutions and delivering exceptional customer service has been our business. We understand that paying attention to the details is critical from the start of any project. Making changes later means inconvenience and additional expenses. We sweat those details so you don't have to.

Because we invented the technology to recycle tires into unique products, you benefit from decades of experience and expertise that only we can offer. That means the right information, advice, and answers when you need them, along with products that have been refined, tested, and retested over the years by our R&D team to deliver precision performance that will not disappoint. It is all accomplished with manufacturing that meets the highest quality standards with the strictest environmental requirements.

Delivering results, developing leaders worldwide

We have grown steadily since 1954 – new products developed, new subsidiaries established and new locations added. Today, **REGUPOL** is still a family enterprise, with third and fourth generations currently working in company management. We have eleven offices in seven countries, all serving as epicenters for innovation, ingenuity, and community.

Behind every **REGUPOL** product, there is a talented team that works together, across the globe, to create performance solutions from reclaimed materials that deliver durability and protection where you need it most without sacrificing sustainability. Whether used to protect surfaces and optimize load transport or to dampen sound and vibration, **REGUPOL** gets it done. We deliver with a level of product, customer service, and investment that only the inventor can offer.

No matter the customer—we aim to make their experience easy and inspiring, at an only-at-**REGUPOL** value.

Customer service excellence for over 65 years.

 REGUPOL

HOW TO ACT MORE SUSTAINABLE? TOGETHER

Caring about the environment is part of the REGUPOL core mission. When it comes to how we conduct our business and develop our products, we think long term. We ask ourselves: How will our actions today impact tomorrow's world? We strive to protect and sustain our environment every step of the way, from development and production to customer use and disposal.

On the road, tires eventually wear down or sustain irreparable damage. But, in the environment, tires can last forever. They are nonbiodegradable, unable to be compacted like plastic or metal, and maintain their shape. Because of their sheer size and impenetrable rubber compound, tires are among the most problematic sources of waste we face today.

Each year we reclaim over 9 million tires (or 90,000 tons of SBR) from landfills to make environmentally sound solutions for the sports, acoustics, commercial, construction, and transportation markets. Our products are comprised of either shredded and cleaned SBR tire rubber (100% post-consumer waste) or a combination of SBR tire rubber and vibrant EPDM (post-industrial waste) color granules. The recycled content ranges from 75% to 100% recycled materials.

We understand that sustainability is not only about material content, which is why our manufacturing facility is near our rubber supplier. By eliminating excessive fuel use created through transportation of resources, fossil fuel expenditures are minimized, and atmospheric damage reduced. We are practically a zero-waste manufacturer regrinding our scrap material for use in some of our products.

There is an increasing demand for honesty and transparency from manufacturers. We were the first Pennsylvania manufacturer to be GreenCircle Certified. They provide independent verification of our products annually to ensure the legitimacy of our recycled content claims. But our commitment to sustainability does not end there; we've gone one step further. We work with UL Environment to independently certify our Environmental Product Declaration (EPD) to better understand and communicate the sustainable qualities and the life-cycle impact of our products.

Products used in the built environment should meet specific criteria for the health and safety of all occupants. These are called Health Product Declarations (HPDs) and are the standardized way of reporting the contents of building products. It is a valuable tool for not only encouraging transparency, it creates a sense of brand trust and is safer for anyone using the property. We make HPDs readily available for our family of brands including **Aktiv**, **Sonus**, and **Revolution**.

We are active USGBC members and our products can potentially assist architects and designers in earning points under 2 out of 9 categories—Materials and Resources and Indoor Environmental Quality—of LEED certification v4.1.

HOW DO YOU GROW TO THE TOP? **TOGETHER**

When you partner with REGUPOL, you become part of a community with a shared goal of leading with excellence and innovation. Our path to success has always been rooted in product innovation and great service, with an eye on the future. We transform over 90,000 tons of high-quality rubber every year to create products that meet and exceed industry standards.

Over the course of our 65-year journey to become a leader in our category of building materials, we have built up a wealth of expertise and forged long-term customer partnerships in 132 countries worldwide—like sprint legend Usain Bolt, who made history on our blue **REGUPOL** running track in Berlin's Olympic Stadium in 2009 when he set two world records.

"There's nothing like running on REGUPOL. To me, REGUPOL equals gold. In more ways than one." – Usain Bolt
