

FITPlus ATHLETIC TURF [CL-FITPL]

SELL SHEET

FITPlus Turf System is the heavy-duty version of our popular FITTurf. FitPlus was developed as a high performing turf system for use in field houses, training facilities or large sport venues where quick lateral movements are most important. The non-infill system uses the same 50/50 blend of nylon and polyethylene fiber with a foam or urethane back as Fit Turf, but has a thicker pad and more-dense pile. FITPlus Turf may be used for a permanent or non-permanent application

Available in a variety of colors in 15' widths.
