

CRG ENVOY SAUNA PROGRAM

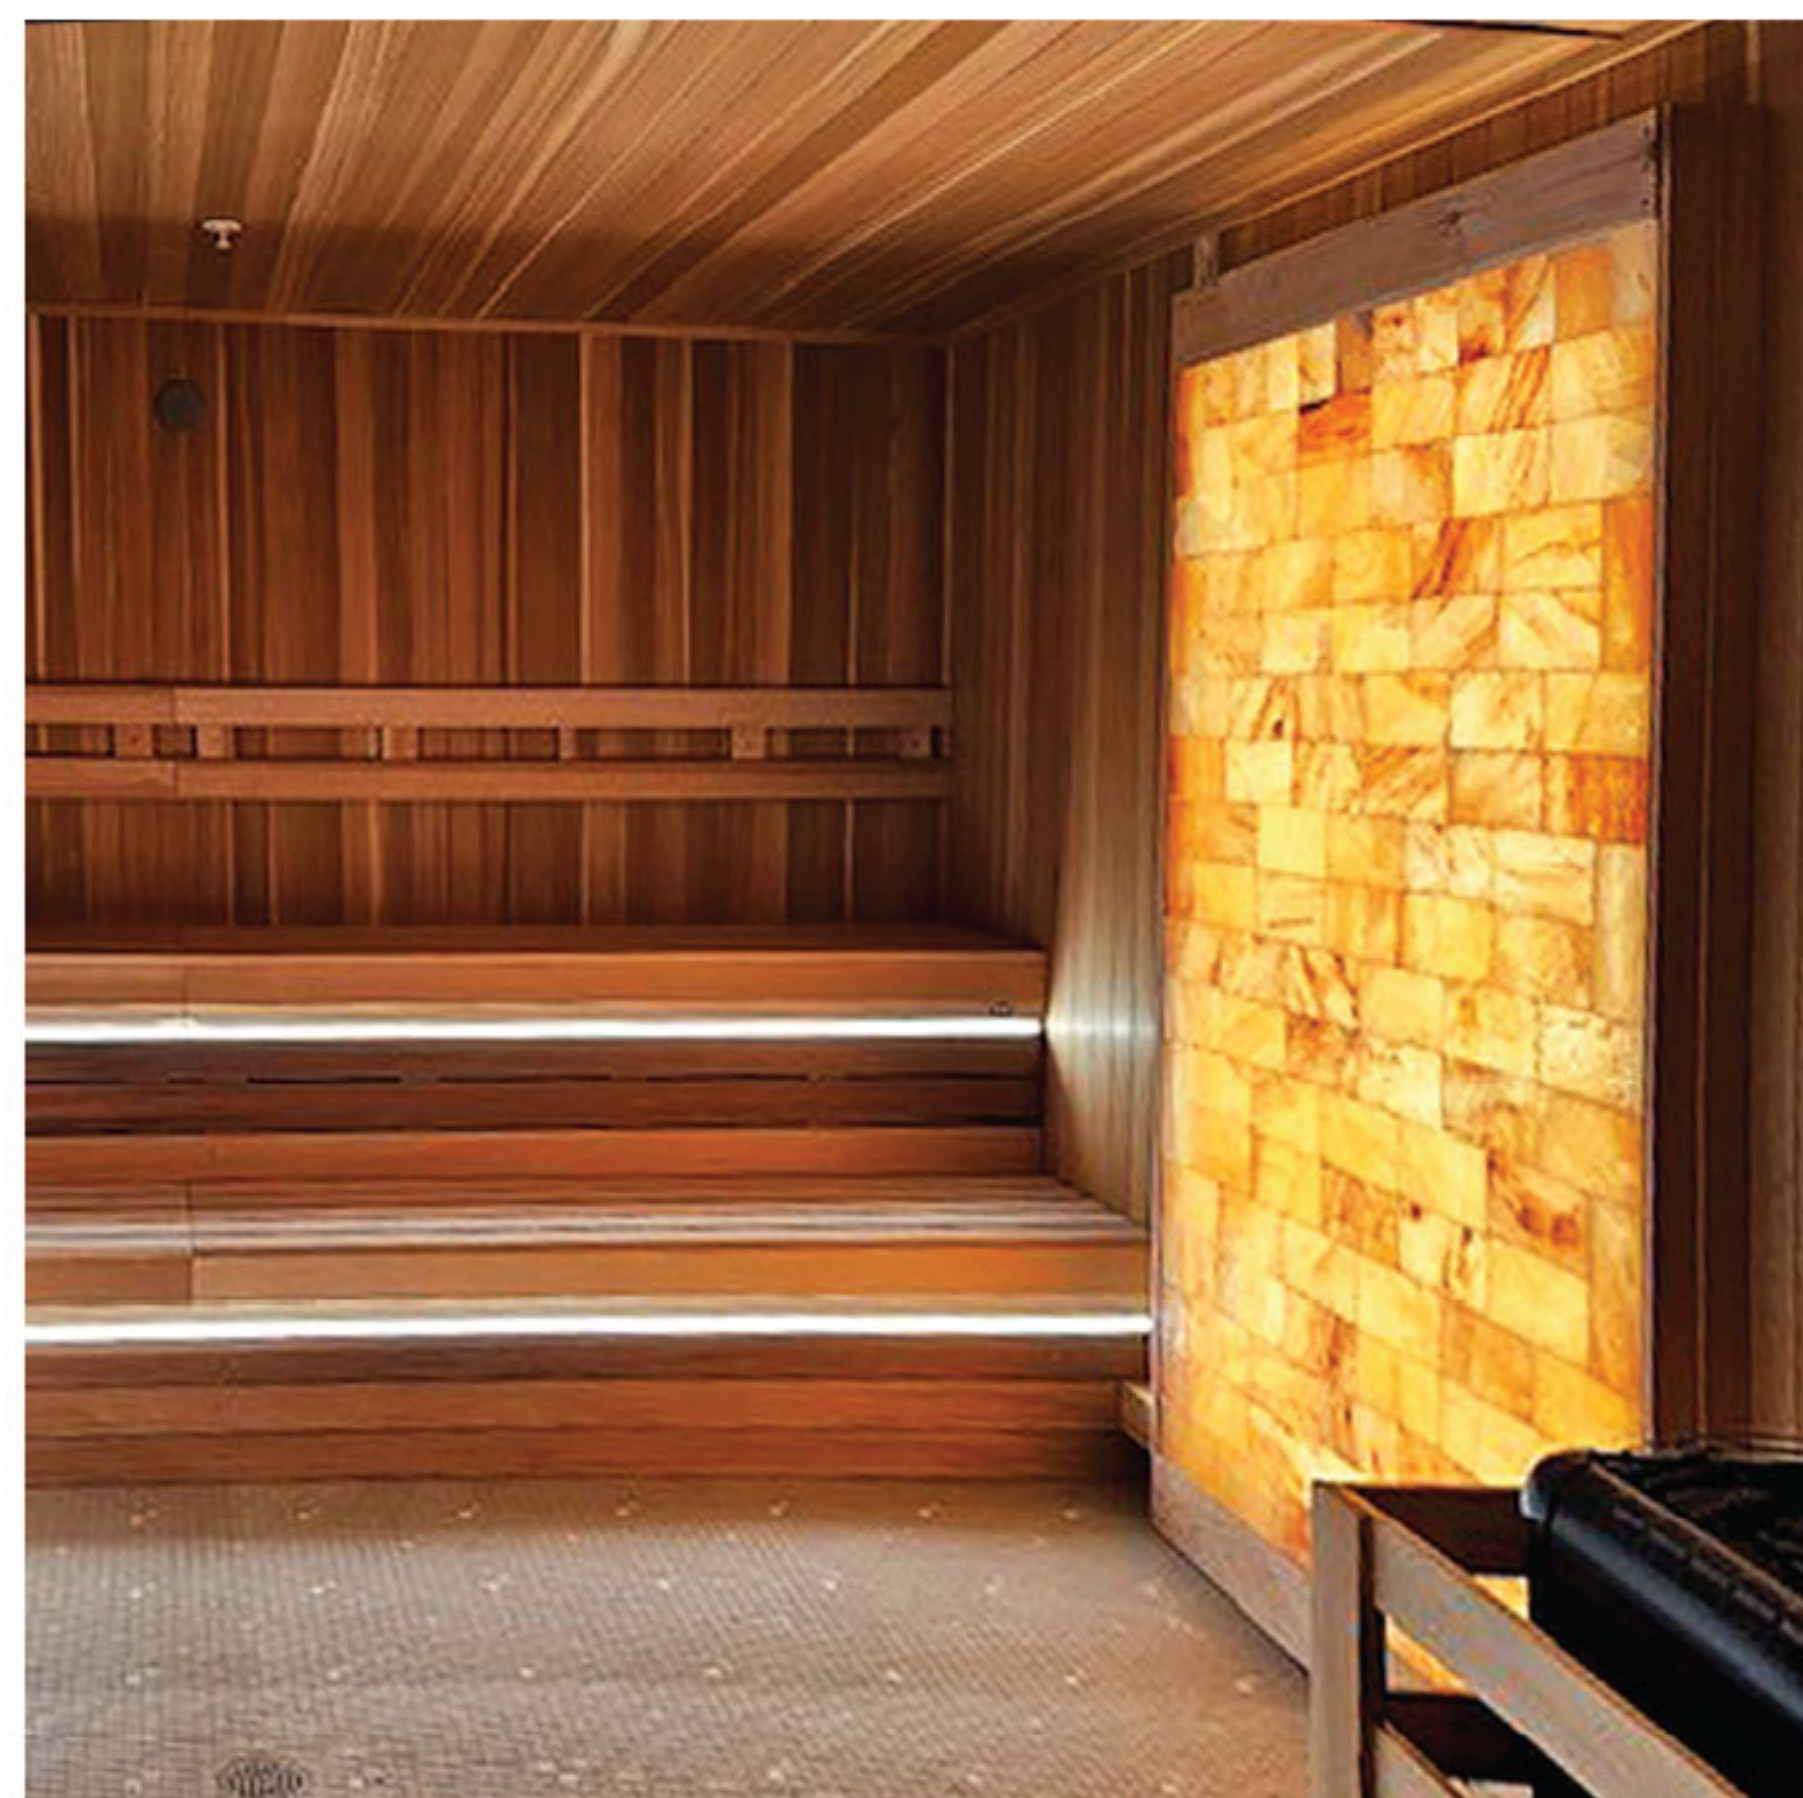

Commercial Sauna Interface for use in conjunction with the CRG Sauna System

The **CRG Envoy Sauna Program** helps manage settings for a sauna, or multiple saunas in a commercial setting over a scheduled period of time. Benefits of Envoy include helping with cost savings by scheduling the saunas on/off time in a facility, reducing power usage. The software automatically updates as needed and troubleshoots variances in the system, assisting in maintenance issues. The system's automatic features also restore operation of sauna schedules after experiencing loss of power to the facility. Access control is regulated to the management of Envoy, leaving guests and staff out of thermostats and control boxes.

Control left to facility manager, not others

Control heat and light settings

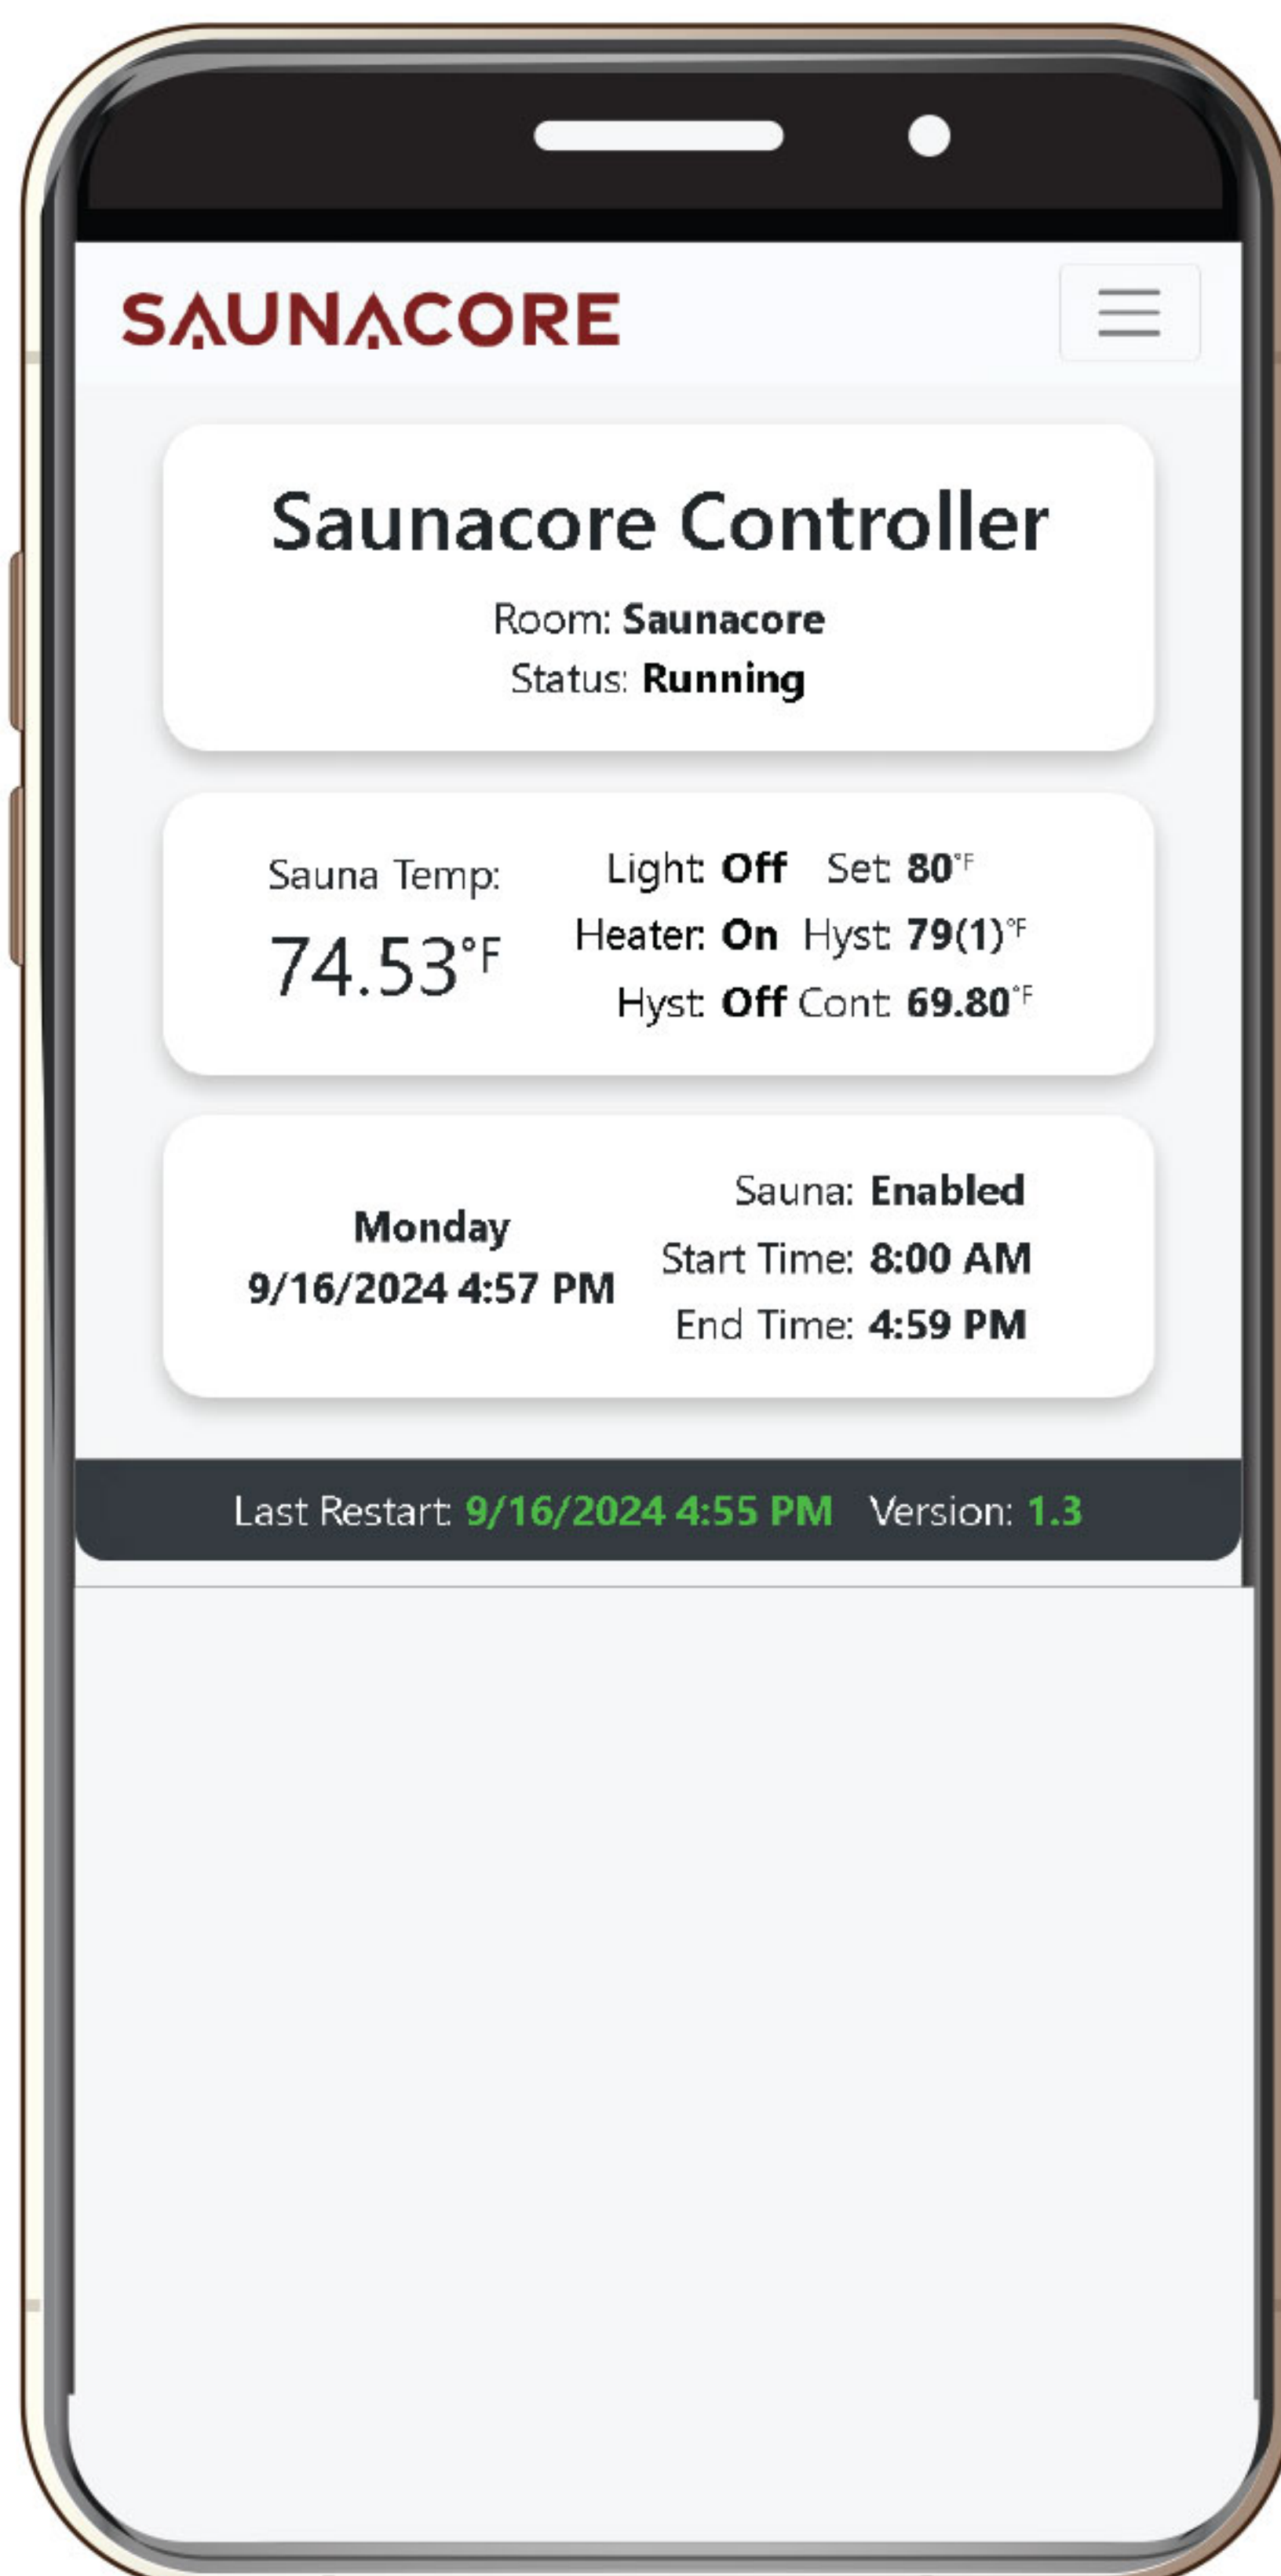

Control sessions 7 days a week

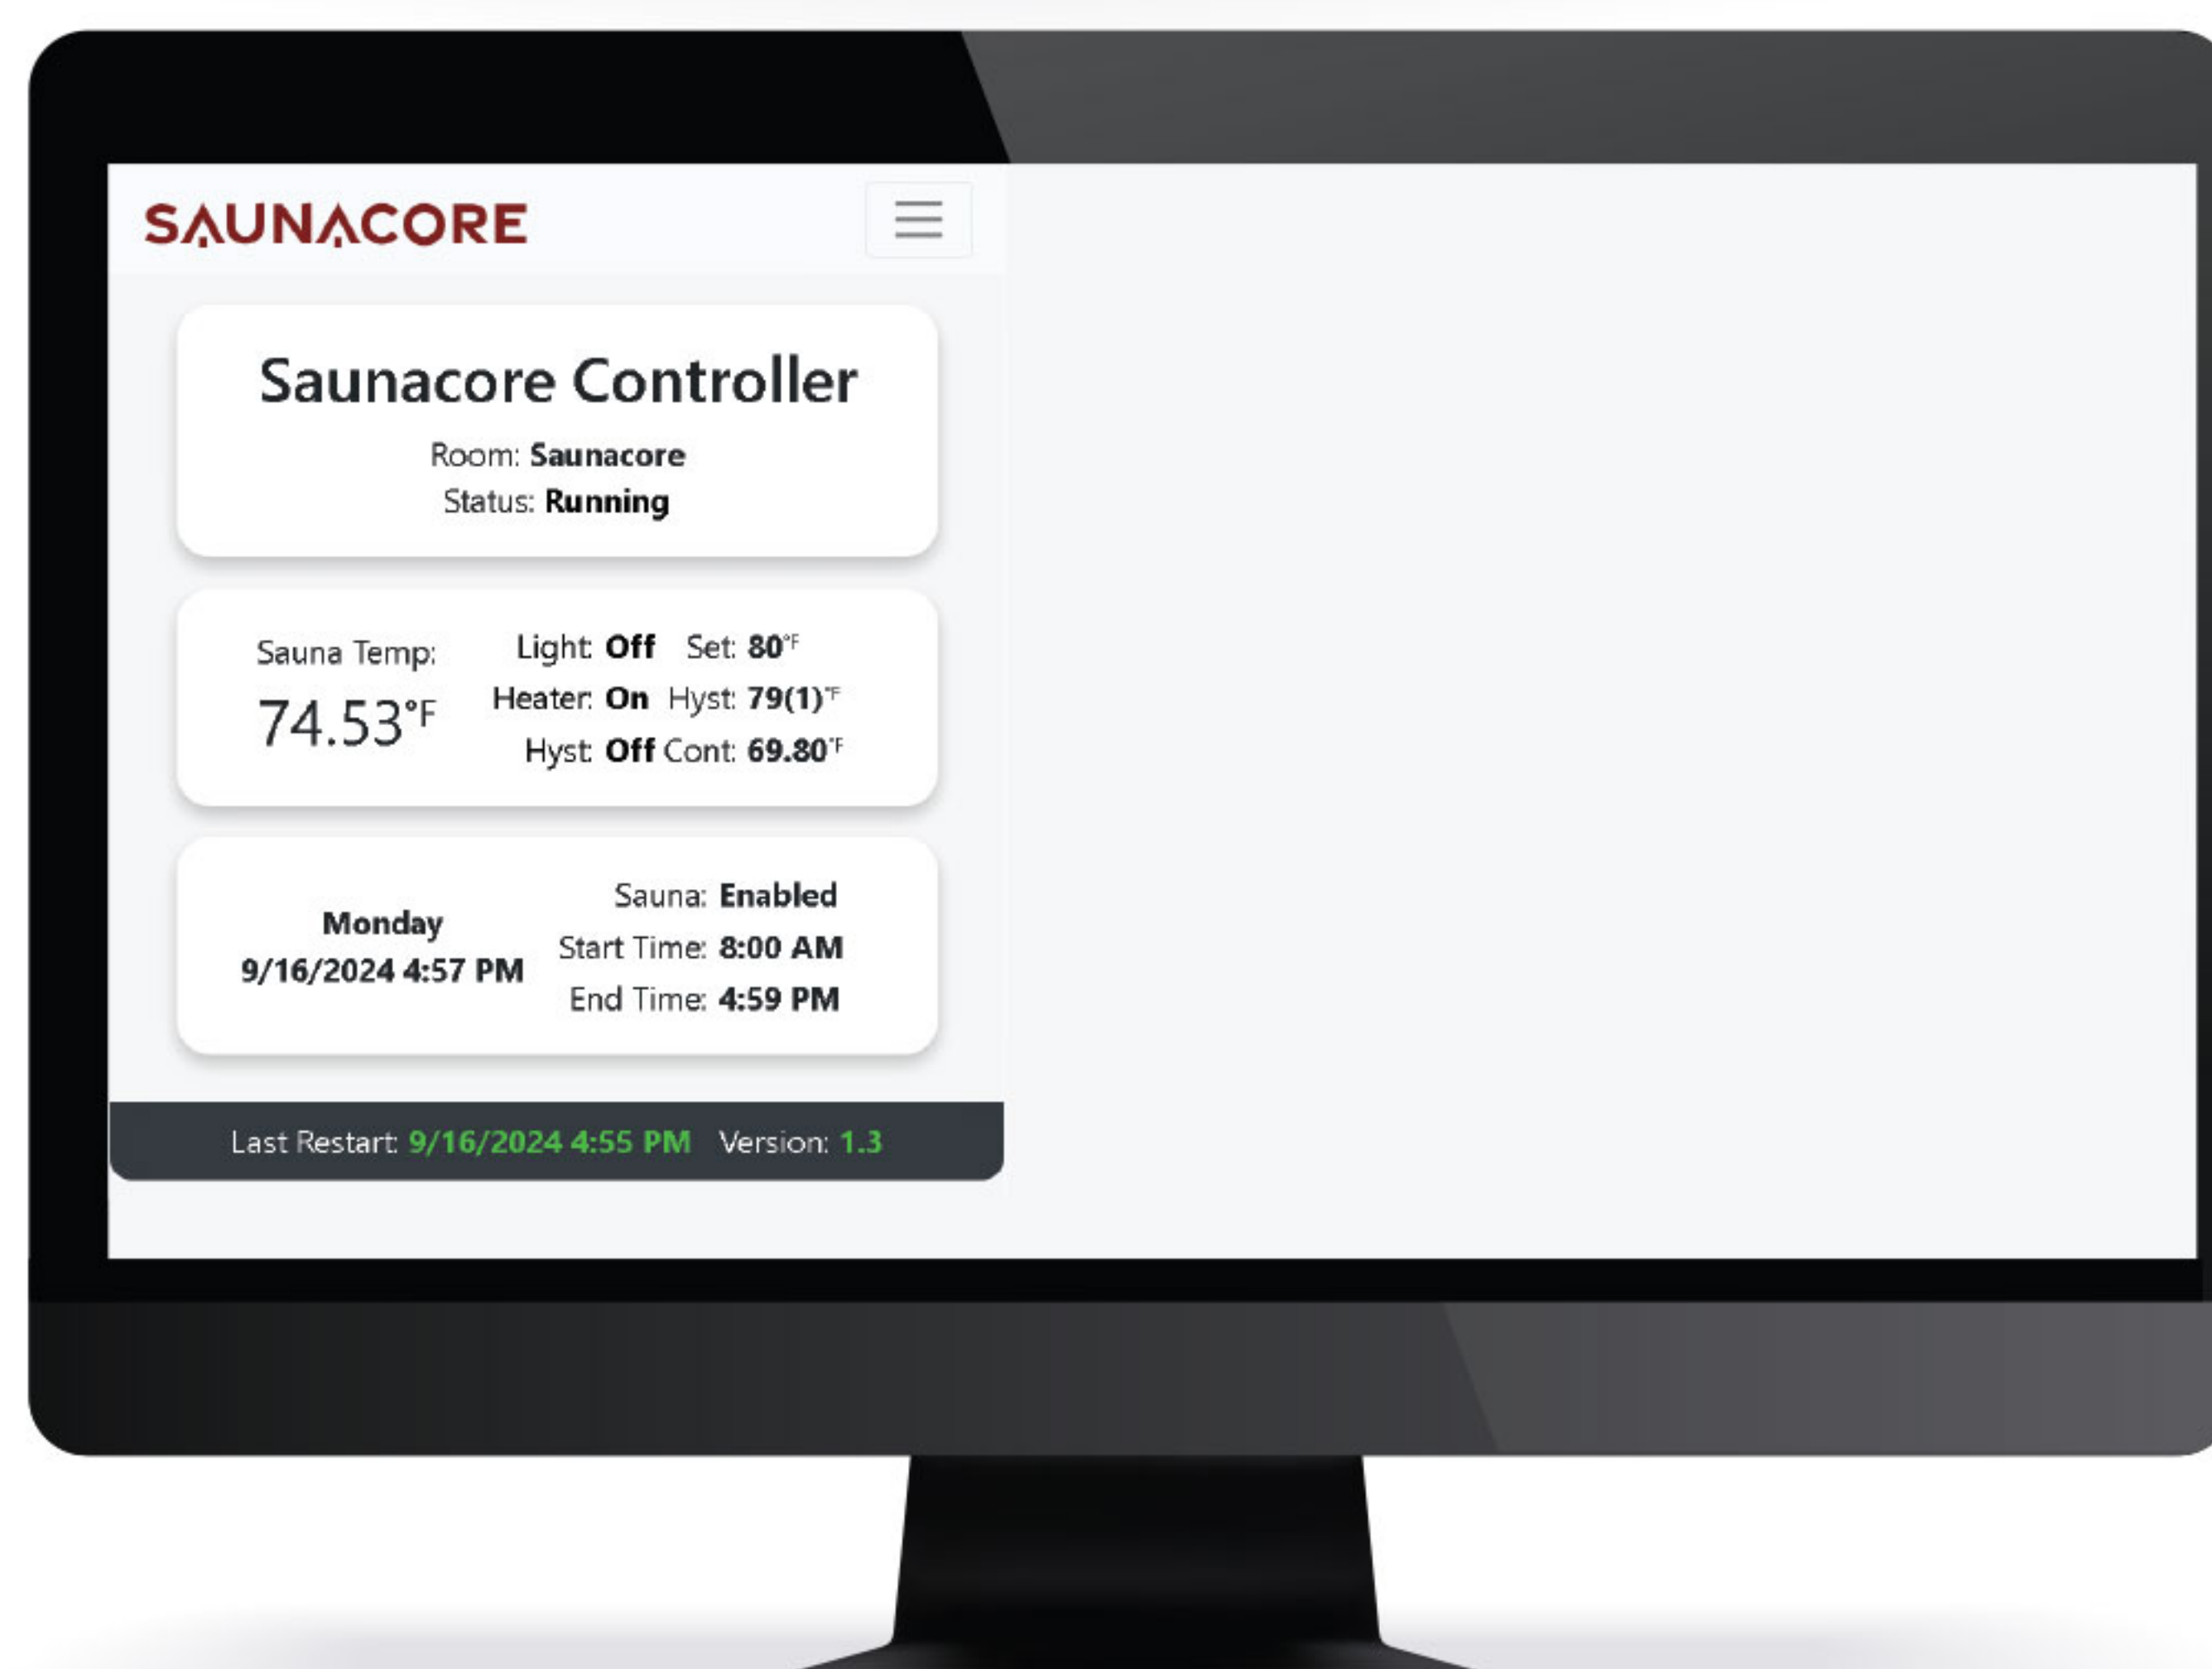

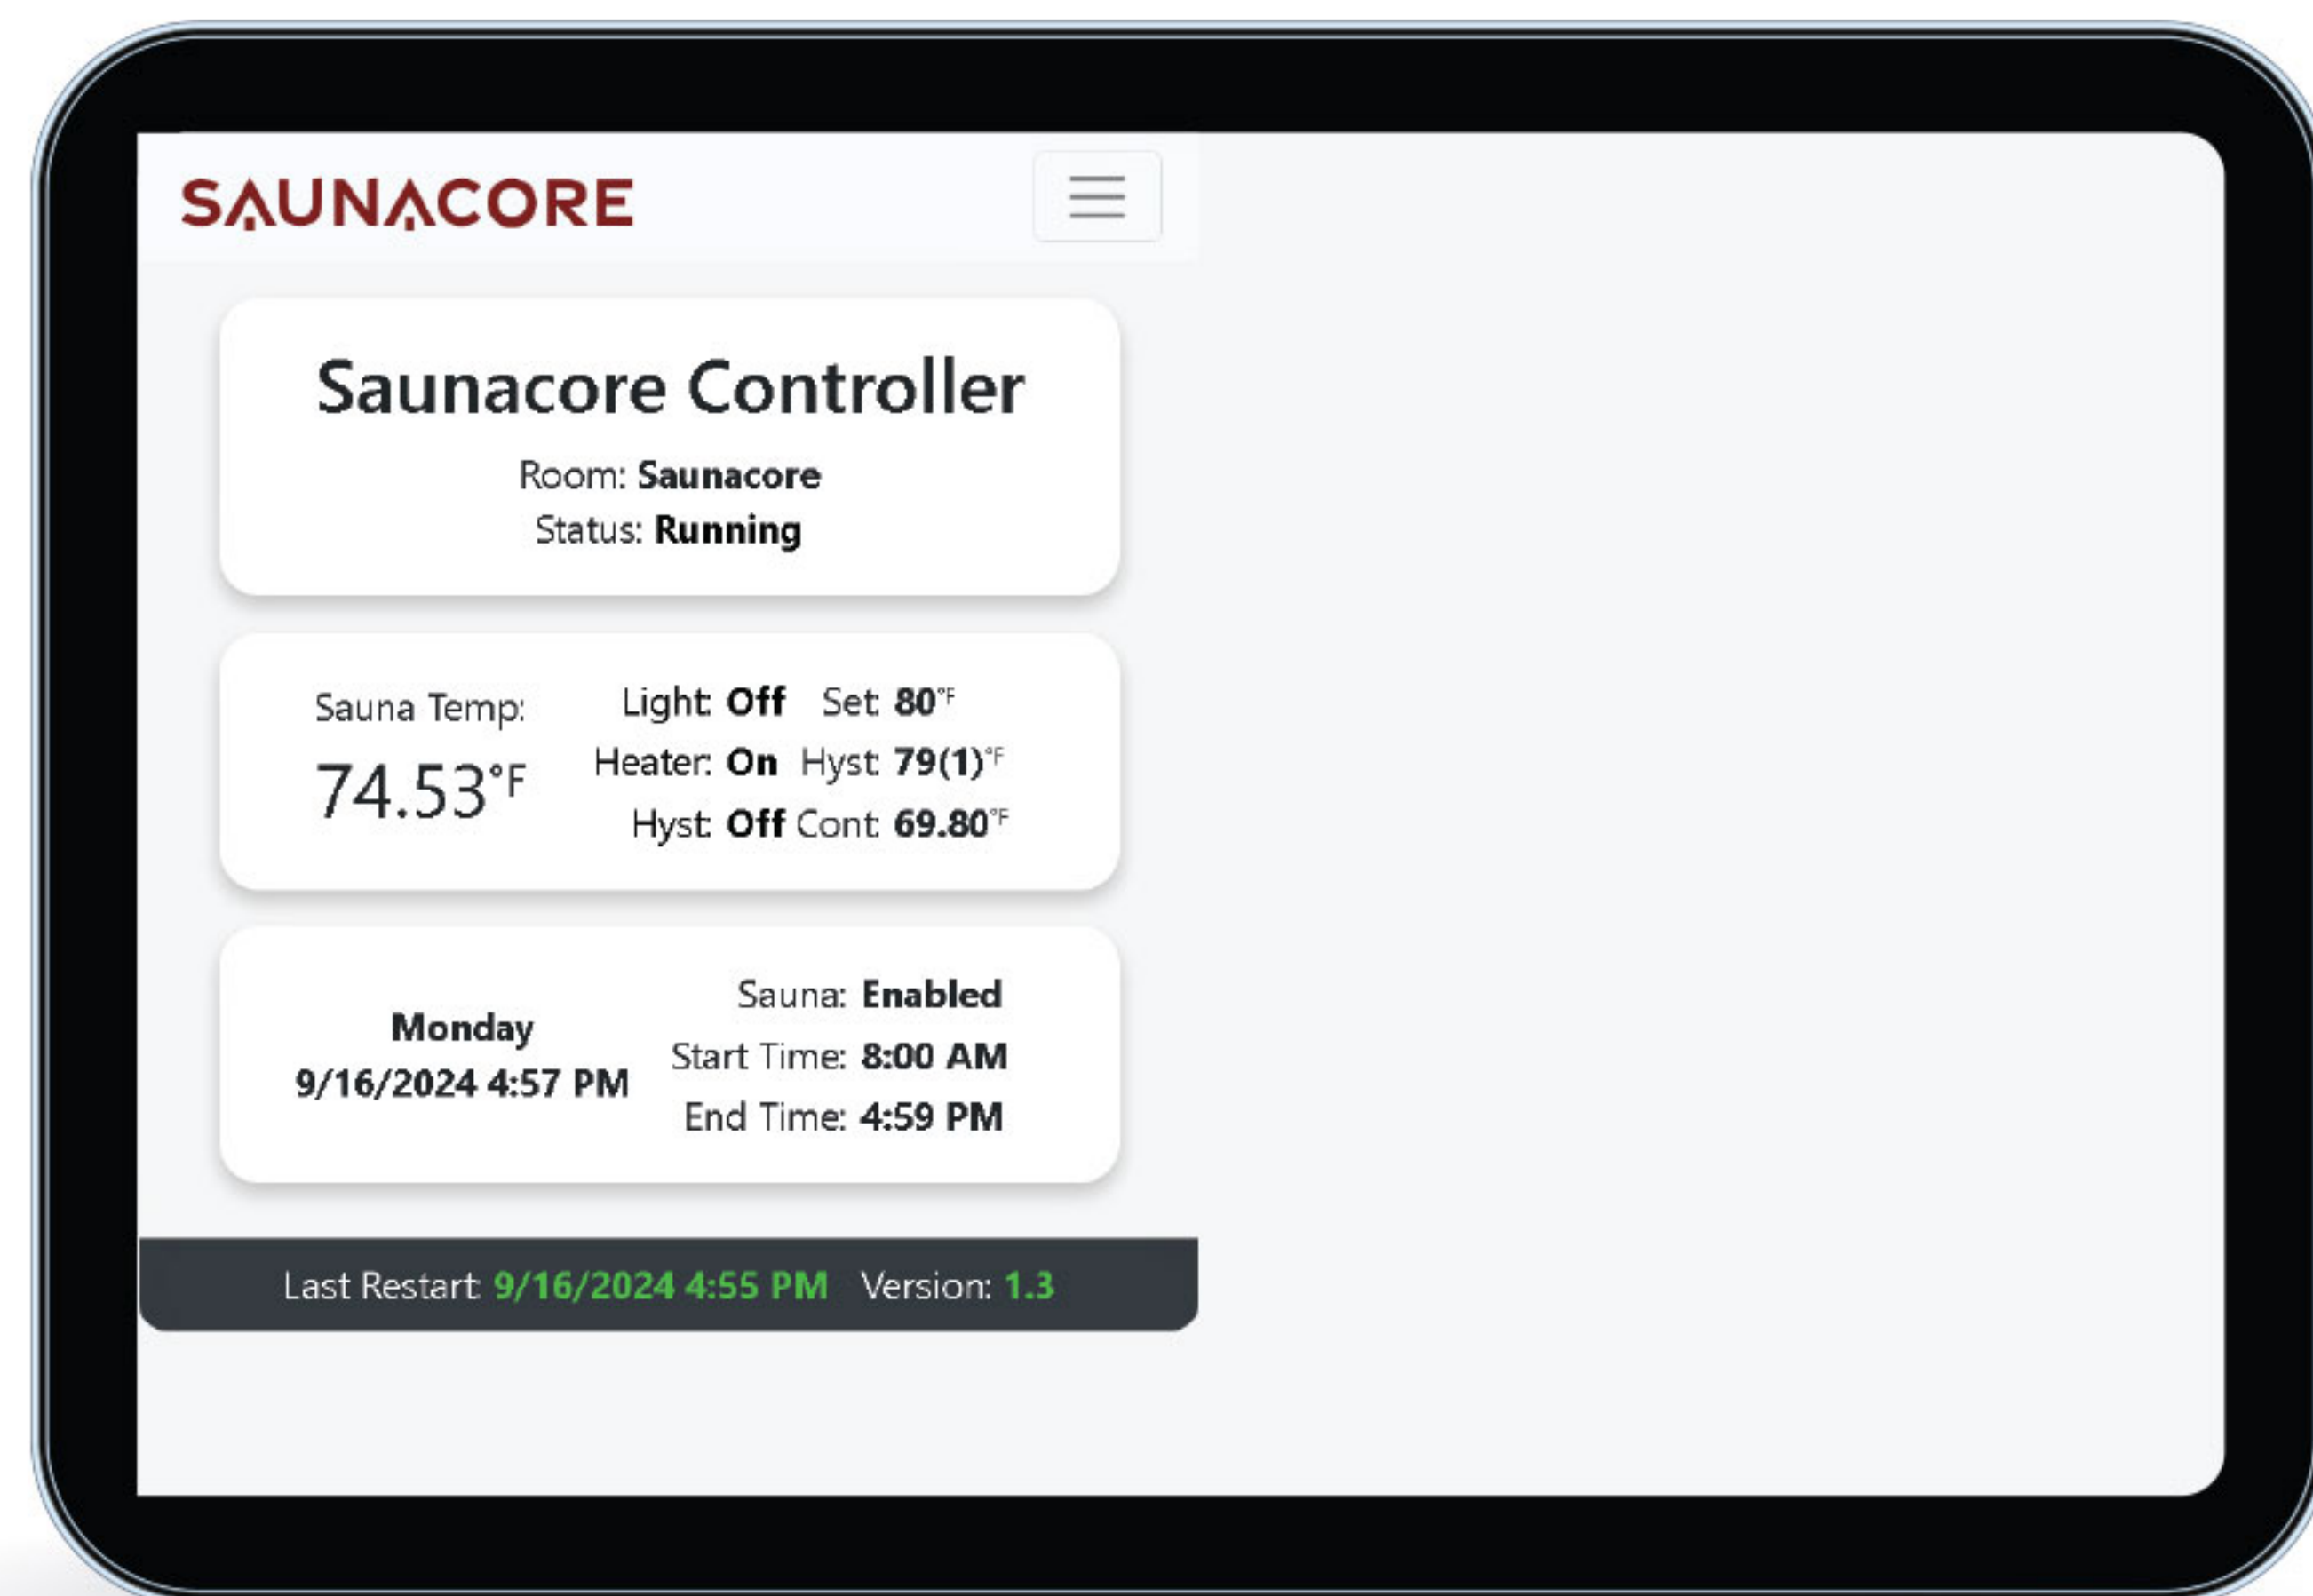

Commercial Sauna Interface for use in conjunction with the CRG Sauna System

>>> FEATURES & BENEFITS

- Directly control IR & Hot Rock Heaters
- Assists with heaters, sauna sessions and lights
- Change sauna settings remotely
- Use any phone, tablet, or work station
- Allows sauna operation by facility manager only
- Holiday tracking stops sauna running when not needed
- Automatic recovery from a power failure
- Automatic software updates

Envoy works on mobile devices – easy to read screen and controls

Envoy tracks operations and maintains a log – assists with system troubleshooting and facility management. Only the facility manager interacts with sauna controls
