SPACE PLANNING

IMPROVE WORKFLOW
CLEAR CLUTTER

Safe & Secure

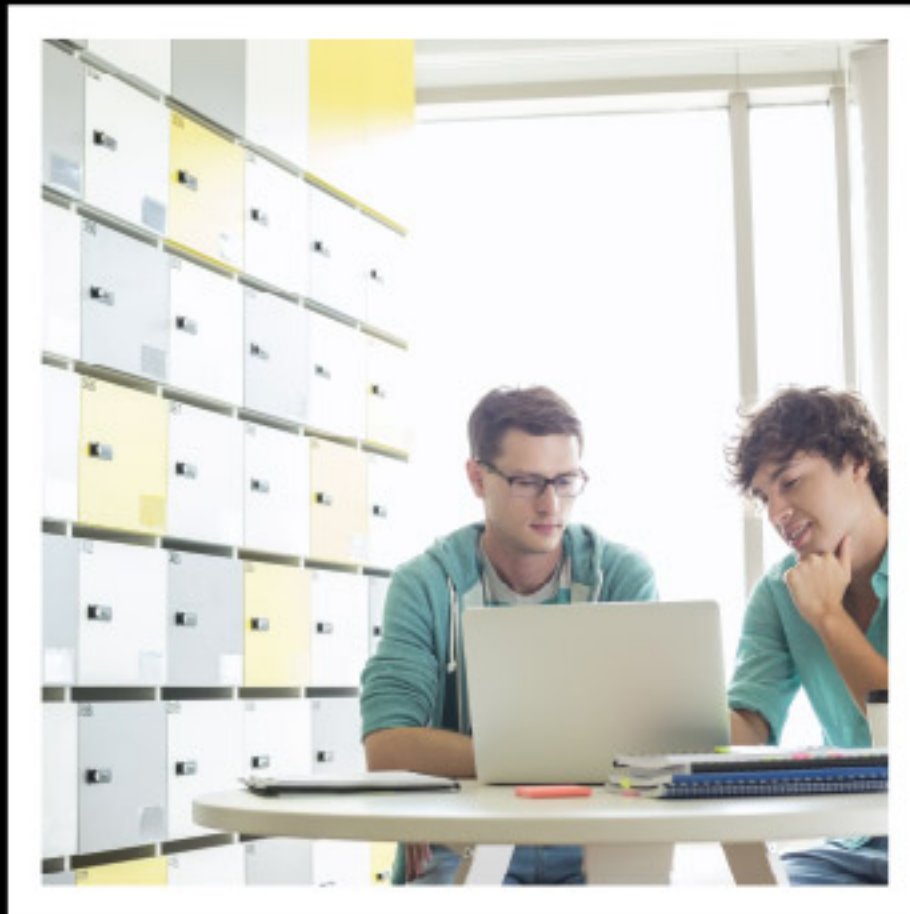

As people bring more high-value items to work like laptops, tablets and other gadgets and gear, it's essential to provide a safe place to secure those items. Urbin locker systems are equipped with simple, yet dependable digital locking technologies. Remote tracking of a locker's usage is even possible.

Agile & Functional

Today's office spaces are more about congregation and collaboration, without the need to be tethered to a desk. Besides providing necessary storage space, locker systems can be used as visual and traffic barriers for groups and departments in open floor plans. Urbin locker systems are completely customizable with added features that improve workspace management.

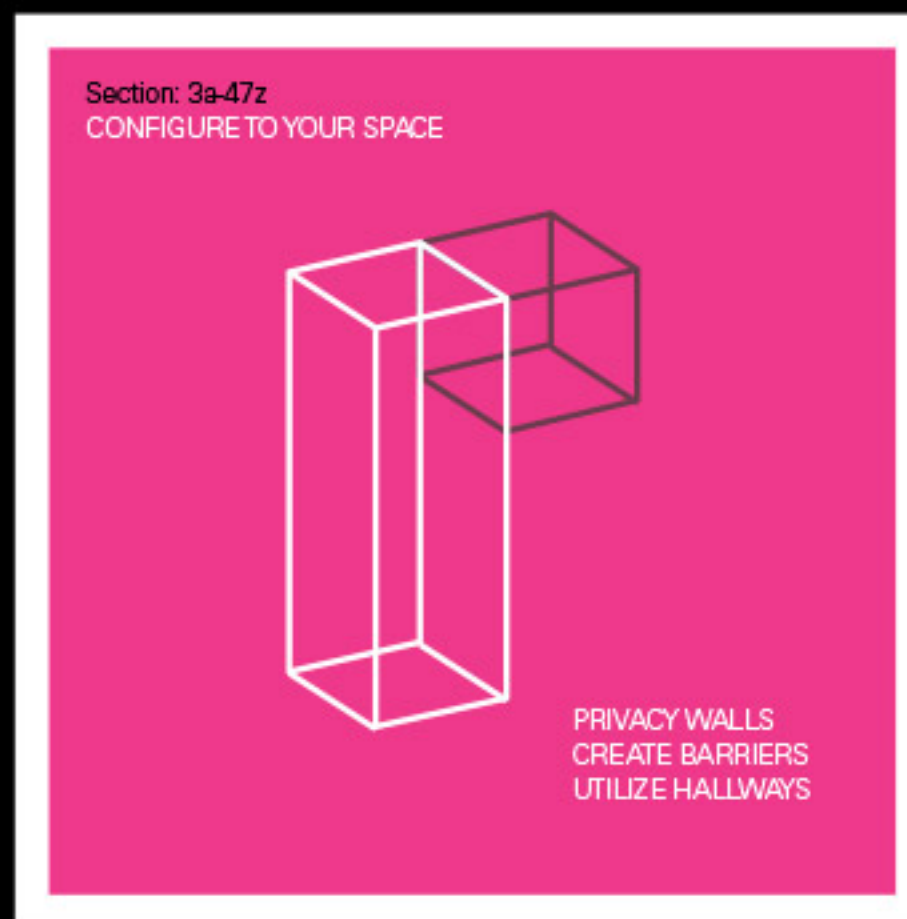

A new generation of locker and security interface for the modern workspace

Stylish & Flexible

More than just a functional fixture, your locker system should make a statement. Urbin locker systems can be designed to meet your space's specific needs for functionality, traffic flow and style. They come in a wide range of colors and finishes including wood, metal, glass and more, and can even be customized to reflect your corporate brand.

Personal & Connected

The right locker system can give employees a sense of belonging and peace of mind. They can be used to identify certain teams, providing a feeling of connectedness. And employees can literally stay connected with USB charging ports, as well as stay organized with rails, hooks, shelves and cubbies.
