Clubline® Lockers deliver modern intelligent locker systems for all environments and applications. More than beautiful locker boxes, Clubline lockers offer intelligent security with digital networked platforms, mechanical dial locks or standard padlock hasps, and more. With over 37 years of experience and knowledge, our team will assist you in development and delivery of a first class locker package that will impress end users or customers.

clublinea®

Beautiful materials adorn our exclusive Clublinea Locker Systems. Ever evolving and advanced products from our European partners, combined with manufacturing expertise in thermal structured surfaces creates one of our best-of-class product lines. For spaces that demand aesthetics and performance characteristics.

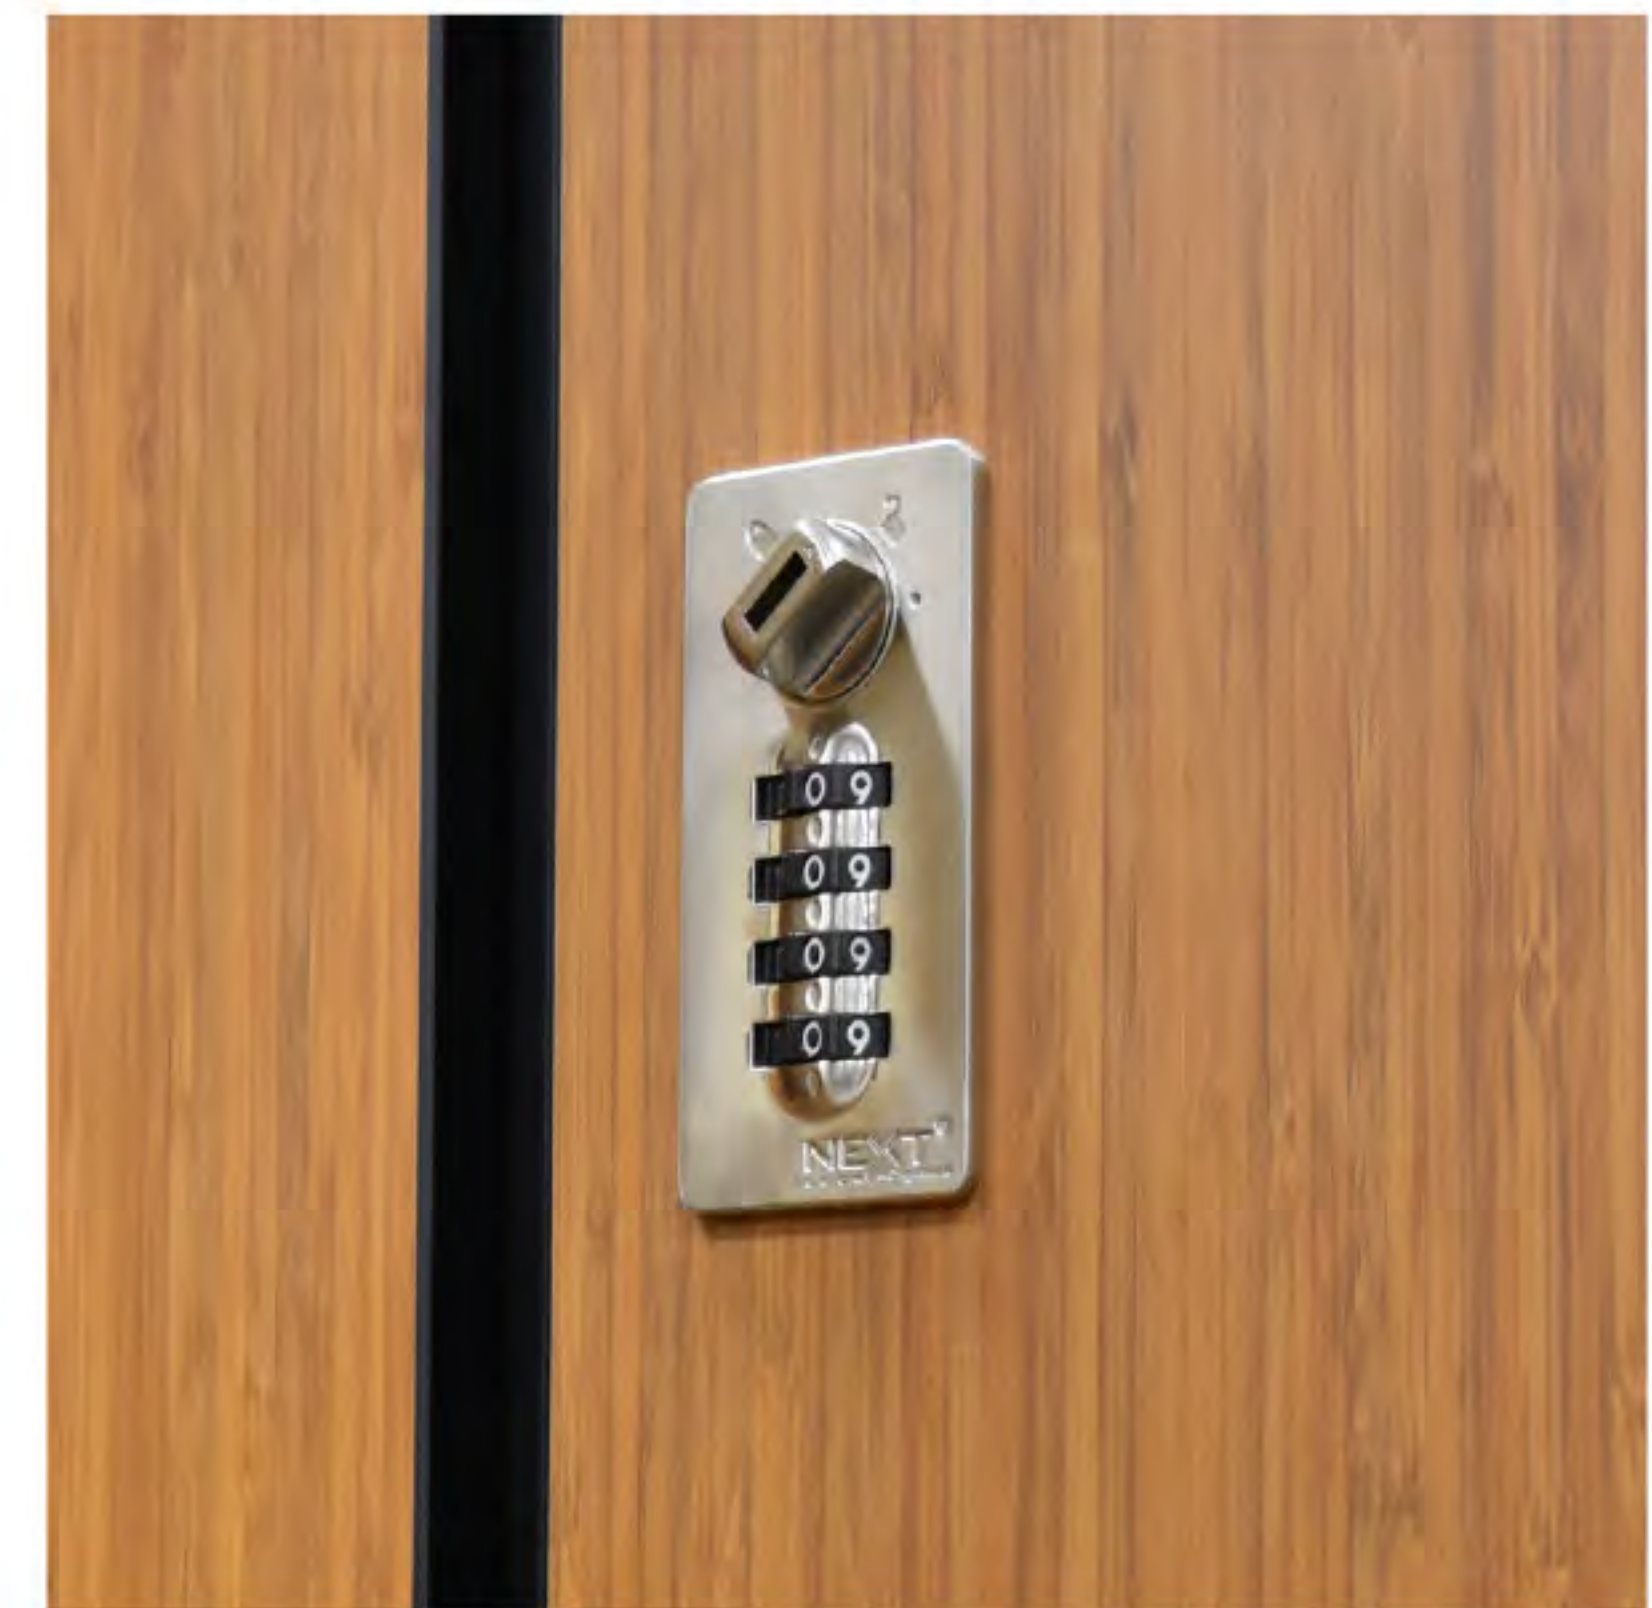

hpl

The first choice for many architects, HPL technology comes in a vast array of colors, wood grains and finishes. The HPL (High Pressure Laminate) line is recognized as the performance standard among laminated surface finishes.

As another option, LPL (Low Pressure Laminate) is also available to meet your locker needs.

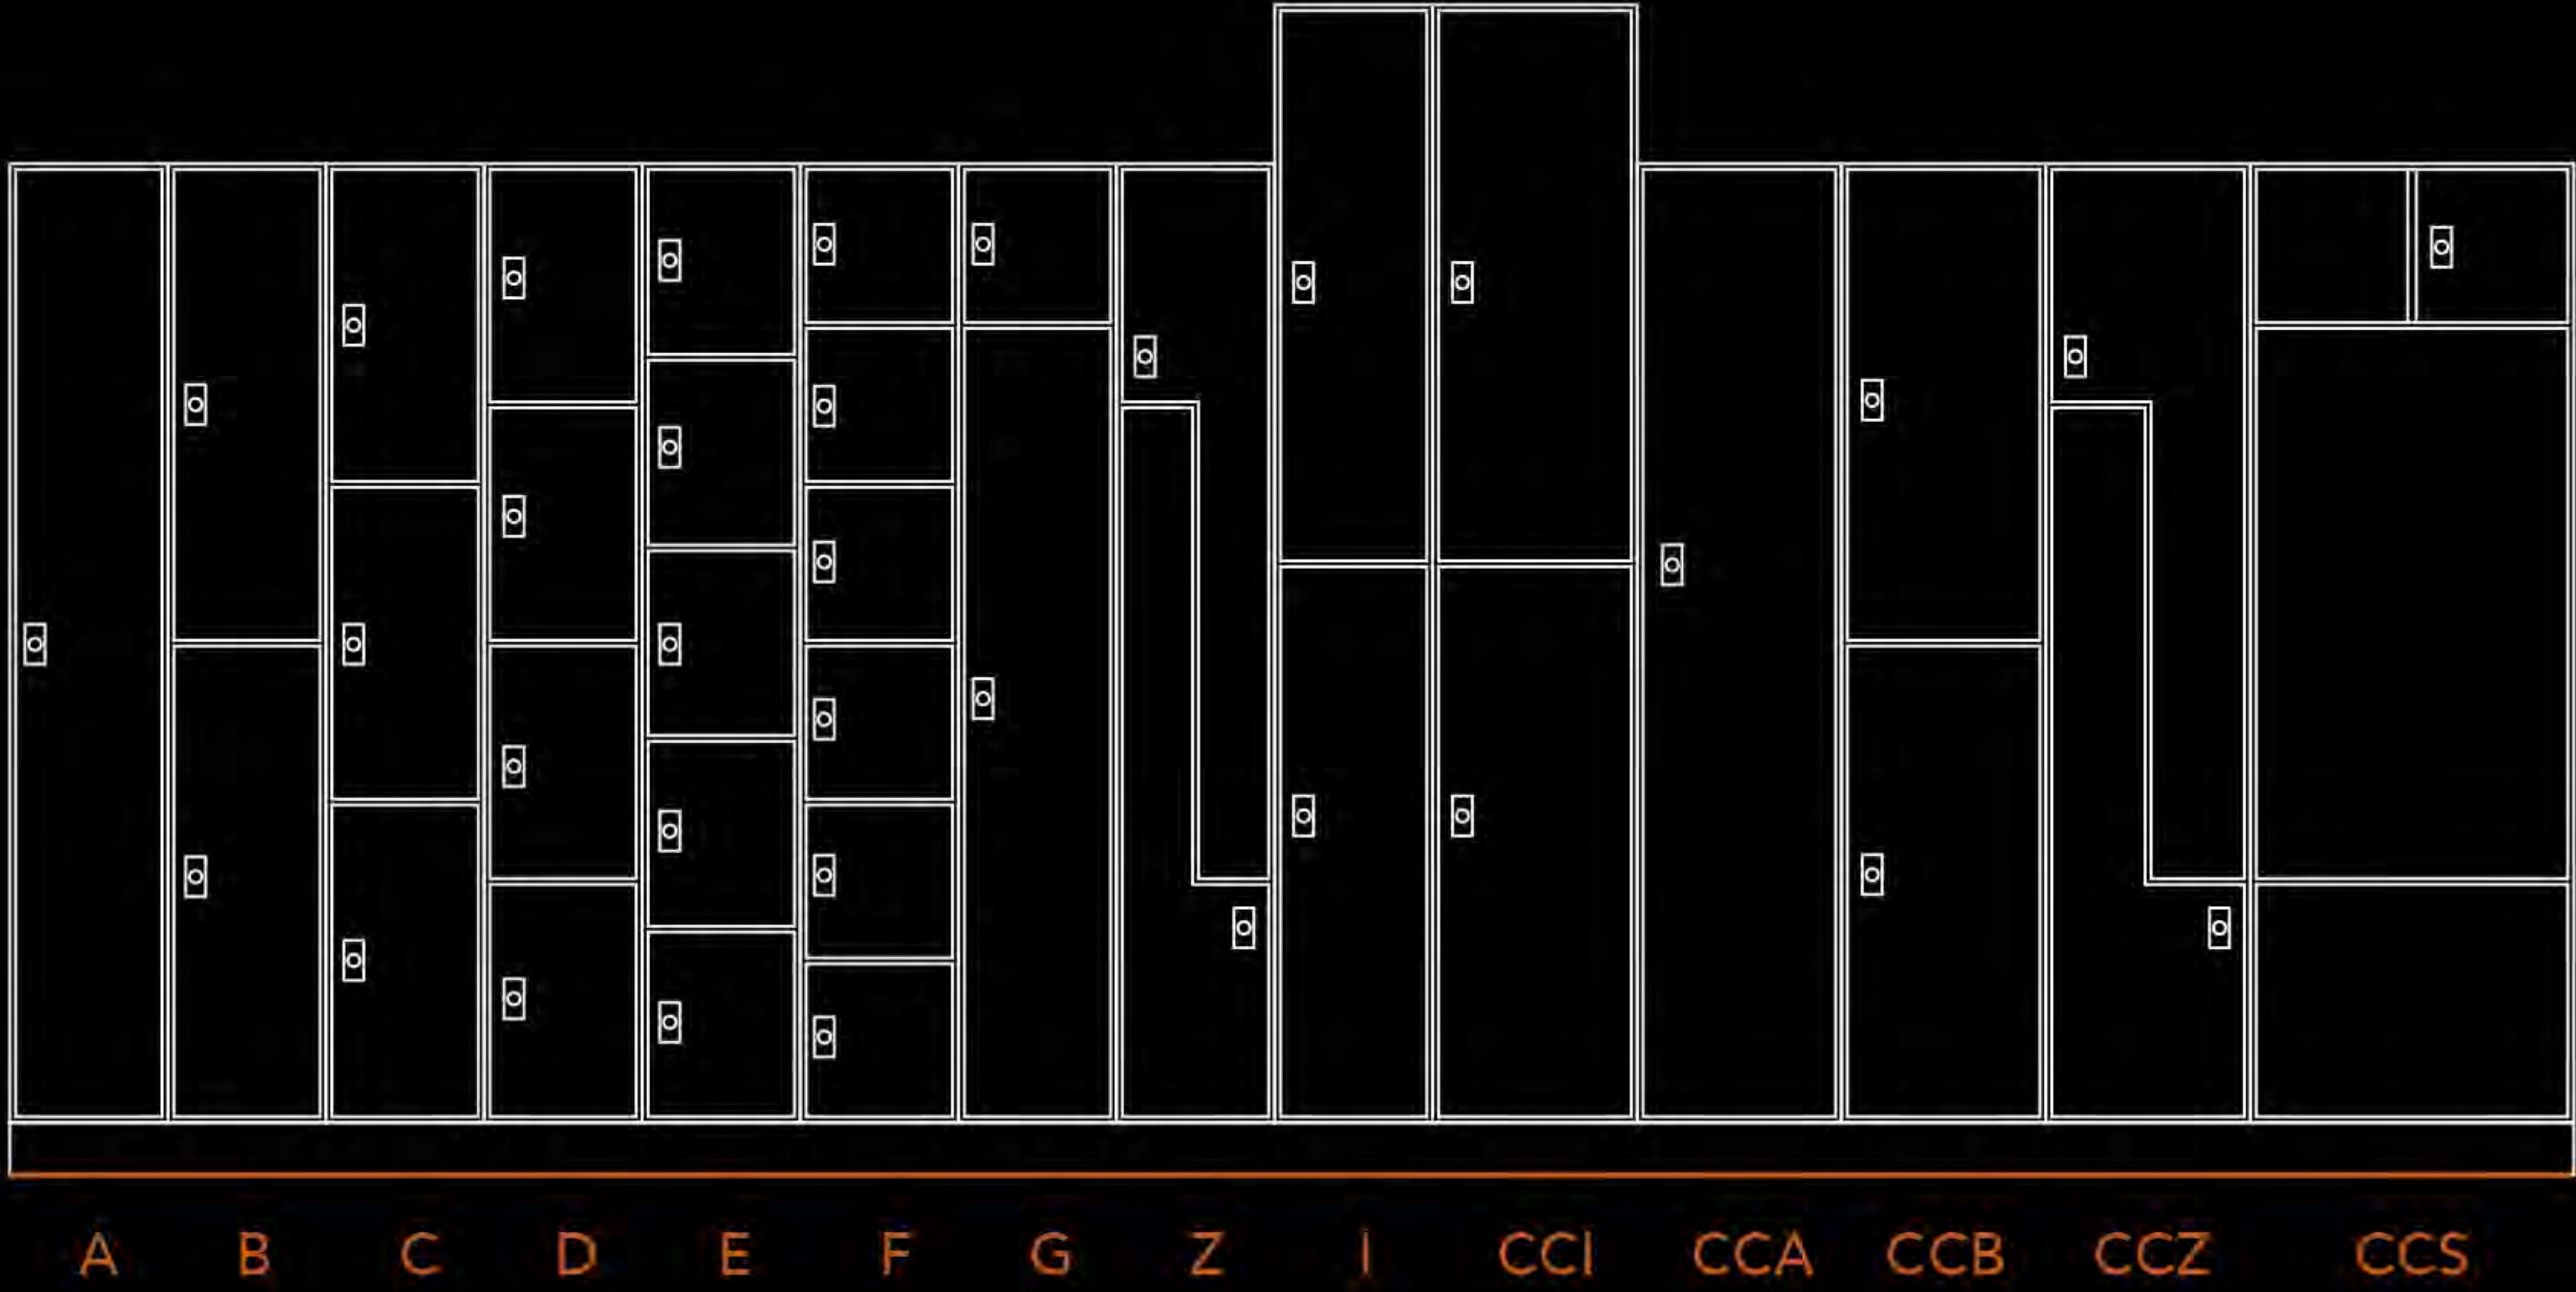

phenolic

Phenolic lockers are versatile, high impact, scratch resistant and have a high chemical tolerance. This material can withstand cleaning with some of the most aggressive cleaning agents and gives top notch performance and a long life. Phenolic lockers are ideal for high volume locker room scenarios.

shapes and layout

Whether used for the workspace or workout space, our team works with you, supporting architects and designers for locker systems that fit the needs of your space. There are many options available with CRG locker systems. Standard configurations and dimensions are available, or mix and match to create something unique. Ask your CRG representative for details on locker layout and dimensions.

smart security options

Having piece of mind knowing valuables are safe at workout and workplace environments is important. We are committed to providing reliable and superior locking technologies that will secure any environment. We supply a complete line of locking mechanisms and offer recommended fitting for your lockers giving you the security you desire.

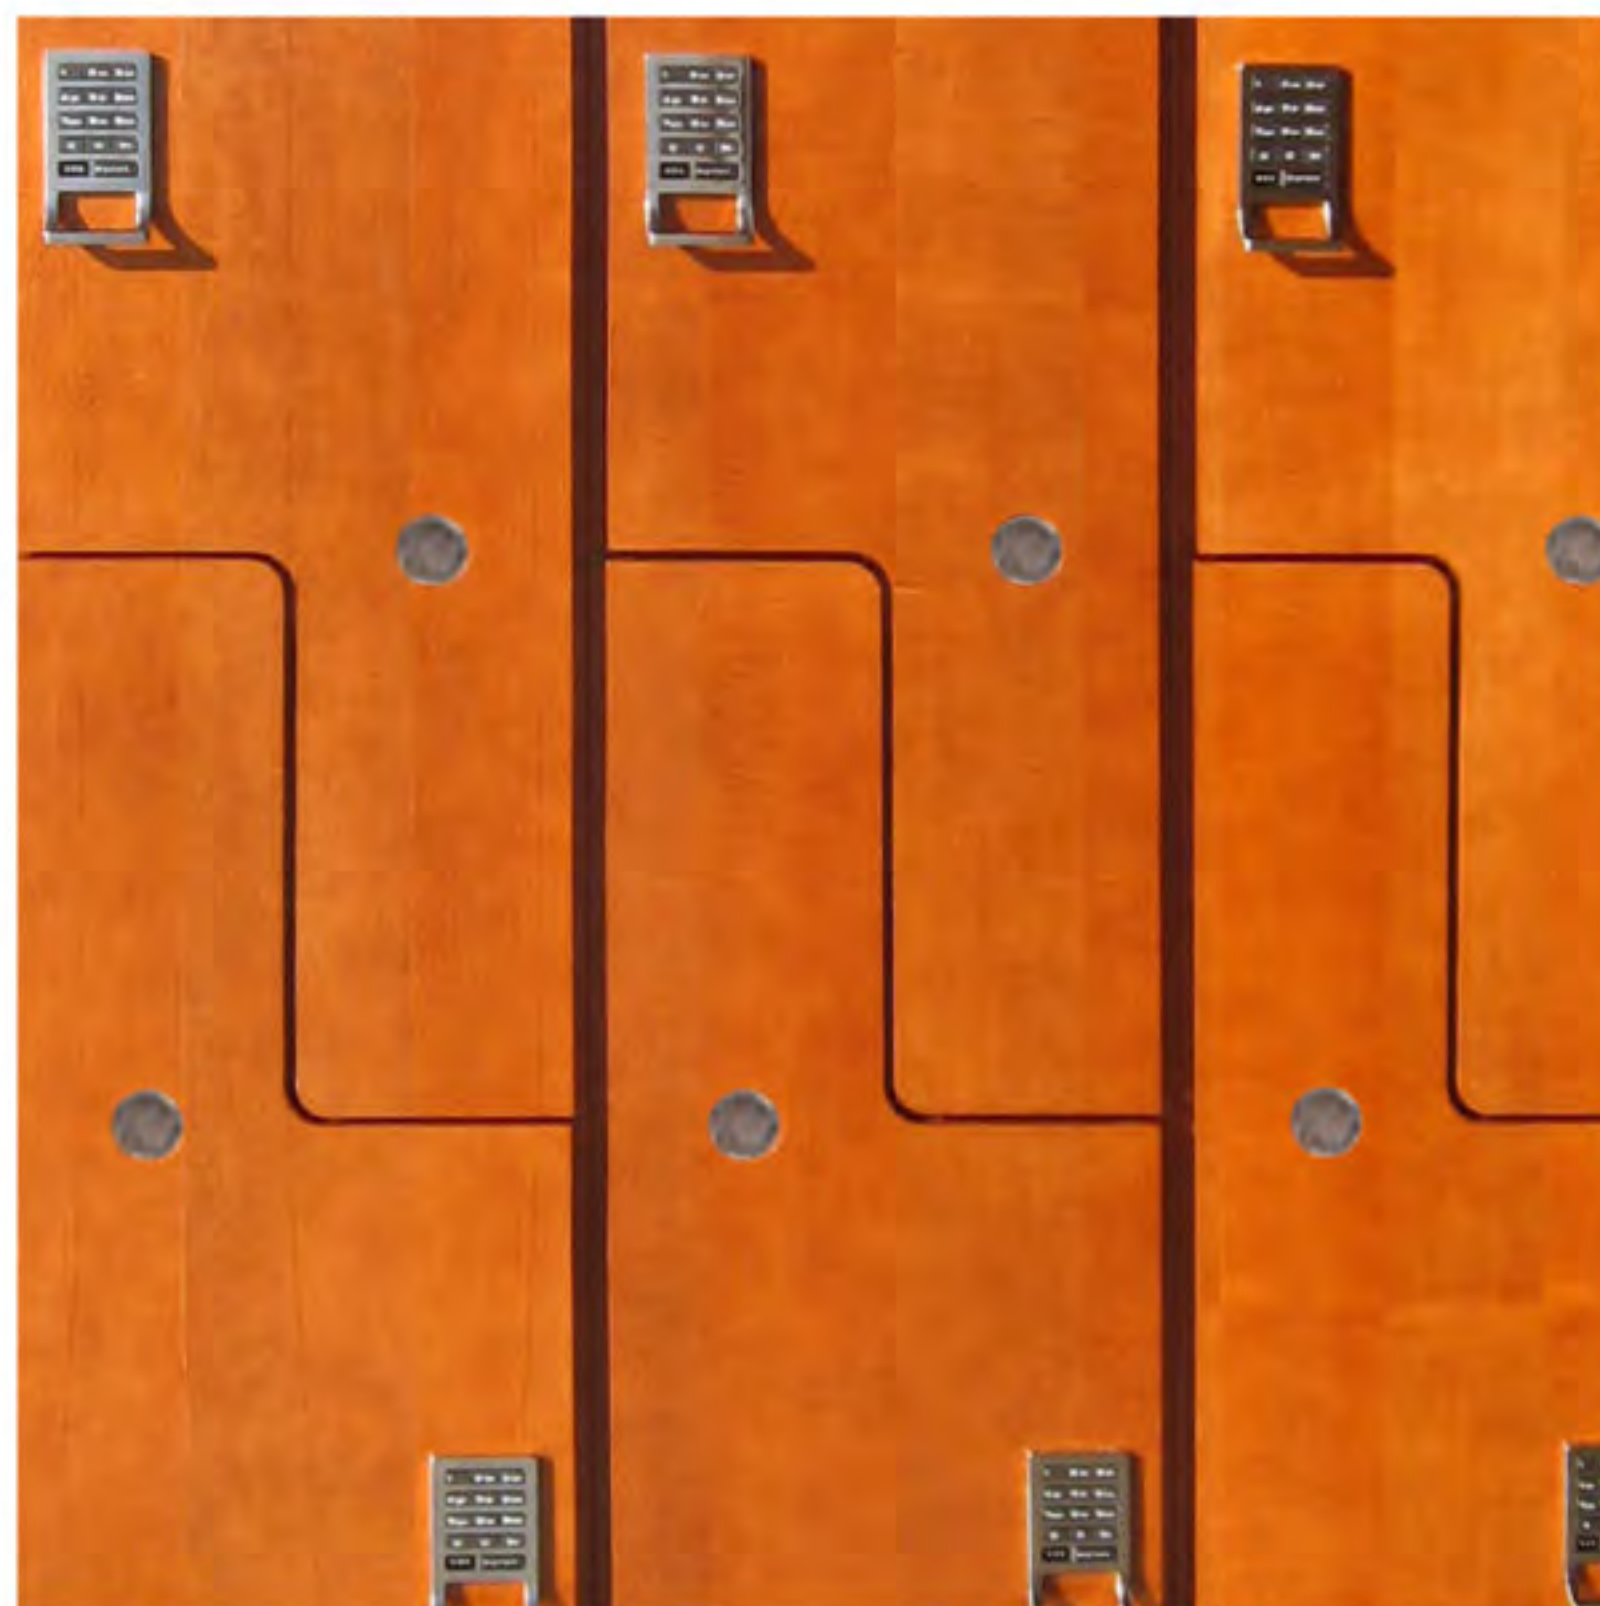

simple locker enhancements

Enhance the interior of your lockers to fit your needs. Choose from a selection of hinge types for functionality. Add drawers, baskets, hooks or hangers to expand storage. Power up with USB charging outlets. Keep track of locker access and usage with network connectivity and interface platforms.

wood panel

CRG designs, fabricates, and provides installation of the highest quality wood locker systems in the industry. Whether flat or raised panel, a combination of premium grade materials and highest quality hardware components ensure that Clubline Lockers offer years of reliable performance and unparalleled aesthetic quality.

urbin locker systems.

Today's office spaces are more about congregation and open collaboration, without the need to be tethered to a desk. Besides providing necessary storage space, lockers can be networked into intelligent and secure office systems. CRG's Urbin Locker Systems are completely customizable with added features that improve workspace management.
