

WALL PANEL SYSTEM

CRG Clubline Wall Systems are designed to be an economical and aesthetically pleasing way to protect and enhance the look of high traffic commercial environments. Our wall system can be configured into many different patterns and colors available from leading laminate manufactures. Each panel comes pre-cut with a vertical grade plastic laminate face and phenolic paper backer, the core is 3/8" thick particle board with standard and custom face colors available. Fire rated core is also available if required.

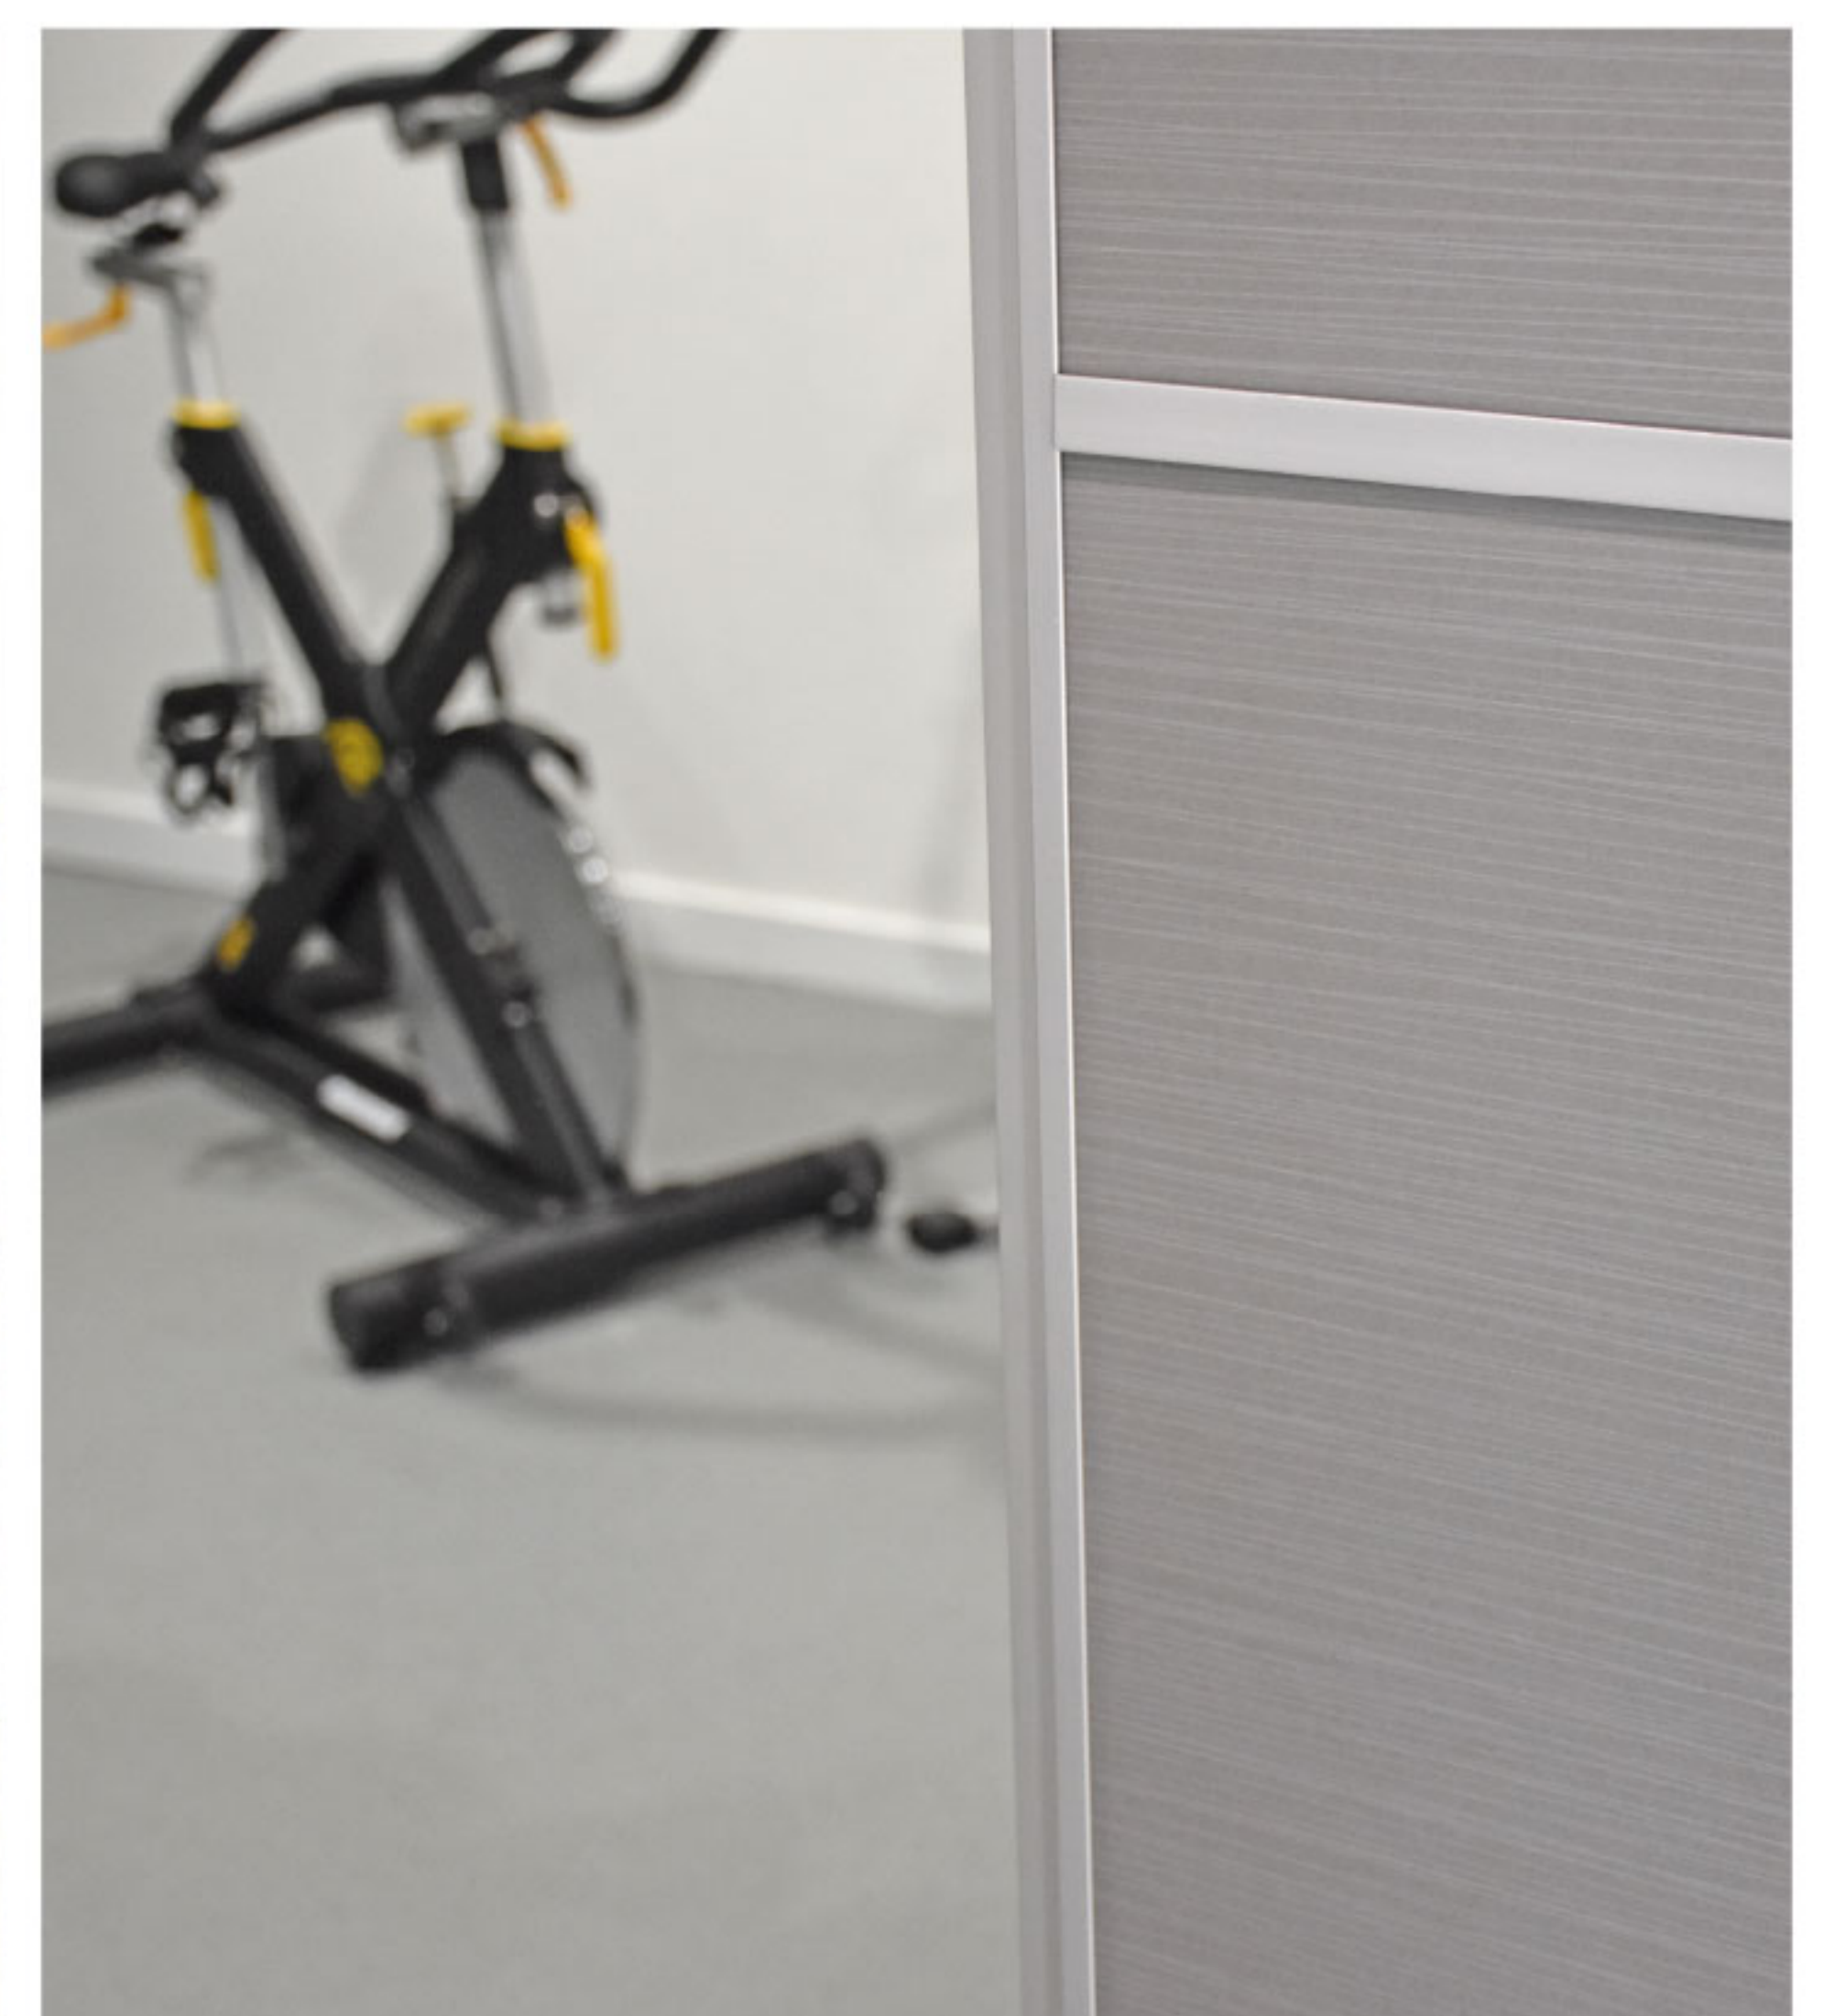

The system is relatively easy to install and requires minimal tools. Begin by applying a series of slotted aluminum extrusions in the desired grid pattern to existing walls, then load the panels into the slots in a step by step process. The CRG Wall Panel Systems provide years of maintenance free wall protection and enhances the overall look and feel of interior spaces.
